

# Claims

[c1] I claim:

1. A device having the appearance of a clock, comprising: numerals placed in a pattern and hands or pointing devices arranged to mimic a conventional clock, having both long and short hands; means provided for changing the position or appearance of position of the pointing devices; and the word WEEKS predominately displayed.

[c2] 2. The device of claim 1 further comprising a moving second hand to mimic normal clock operation.

[c3] 3.The device of claim 2 wherein the second hand movement is accompanied by a ticking noise to simulate true clock operation .

[c4] 4.The device of claim 1 wherein a blue color is used to associate the device with a male infant or a pink color is used to associate the device with a female infant.

[c5] 5. The device of claim 4 further comprising a moving second hand to mimic normal clock operation.

- [c6] 6. The device of claim 5 wherein the second hand movement is accompanied by a ticking noise to simulate true clock operation.
- [c7] 7. A device having the appearance of a clock, comprising: numerals placed in a pattern and hands or pointing devices arranged to mimic a conventional clock, having both long and short hands; means provided for changing the position or appearance of position of the pointing devices; and the word DAYS predominately displayed.
- [c8] 8. The device of claim 7 further comprising a moving second hand to mimic normal clock operation.
- [c9] 9. The device of claim 8 wherein the second hand movement is accompanied by a ticking noise to simulate true clock operation.
- [c10] 10. The device of claim 7 wherein a blue color is used to associate the device with a male infant or a pink color is used to associate the device with a female infant.
- [c11] 11. The device of claim 10 further comprising a moving second hand to mimic normal clock operation.
- [c12] 12. The device of claim 11 wherein the second hand movement is accompanied by a ticking noise to simulate

true clock operation.

- [c13] 13. A device having the appearance of a clock, comprising: numerals placed in a pattern and hands or pointing devices arranged to mimic a conventional clock, having both long and short hands; means provided for changing the position or appearance of position of the pointing devices; and the word MONTHS predominately displayed.
- [c14] 14. The device of claim 13 further comprising a moving second hand to mimic normal clock operation.
- [c15] 15. The device of claim 14 wherein the second hand movement is accompanied by a ticking noise to simulate true clock operation.
- [c16] 16. The device of claim 13 wherein a blue color is used to associate the device with a male infant or a pink color is used to associate the device with a female infant.
- [c17] 17. The device of claim 16 further comprising a moving second hand to mimic normal clock operation.
- [c18] 18. The device of claim 17 wherein the second hand movement is accompanied by a ticking noise to simulate true clock operation.
